Dynamic Frontend Developer with 3 years of comprehensive experience in crafting efficient, user-friendly web applications. Proficient in Javascript, Typescript, and ReactJS, combining technical expertise with a creative approach to interface design. Adept at collaborating with cross-functional teams to translate complex requirements into innovative solutions while ensuring seamless deployment. Driving continuous improvement in performance and user satisfaction. A strong foundation in both front-end and back-end development reinforces the ability to deliver holistic digital experiences.

Experience

Frontend Developer

2024 - present

PT. OS Selnajaya, Jakarta Pusat, Indonesia (onsite)

- Developed and launched a comprehensive Next.js-based job finding system, specifically connecting Indonesian talent with career opportunities in Japan, significantly enhancing OS Selnajaya's international recruitment capabilities.
- Engineered a robust Content Management System (CMS) within the platform, enabling real-time content updates, strengthening employer branding, and optimizing SEO for critical job postings and program information.
- Integrated interactive webinar and program management features, fostering greater candidate engagement and facilitating scalable training and direct communication channels for job seekers.
- Streamlined end-to-end candidate management workflows by building an integrated system, significantly improving efficiency for HR consultants in processing applications, tracking progress, and post-hiring follow-ups.
- Leveraged Next.js's Server-Side Rendering (SSR) and Static Site Generation (SSG) capabilities to build a unified, high-performance platform, ensuring seamless user experience, enhanced data visibility, and streamlined operational processes across all modules.

Fullstack Developer

2023 - 2024

Unsircle, Jakarta, Indonesia (onsite)

- Assisted project managers in understanding client requirements and planning technical solutions.
- Reviewed and influenced ongoing designs, standards and methods for website, intranet and application development projects.
- Wrote and defined clean codes to achieve functional and sustainable web applications.
- Collaborated with DevOps engineers to verify code is planned and deployed to production environments with minimum disruption to end users.

Front-End Developer

06/2023 - 07/2023

Freelance, Jakarta, Indonesia (remote)

- Assessed data to recommend and plan installation of new systems or modifications of existing ones.
- Revised existing software to upgrade interfaces and elevate performance.
- Researched new and emerging technologies to stay abreast with trends and best practices.

- An updated work from the previous project to be more efficient and effective
- Having 3rd party API for payment gateway
- More schedule automatic function for flexibility system
- Scheduled meetings with clients to discuss website design preference and requirements.
- Contributed to back-end experience and collaborated on APIs.

Core Qualification
